**MAINE
HUNTING SHOE**

Example of your gift making a difference in your world
in your lifetime. This annual report is available for you in
print or on our website.

The Maine Hunting Shoe is designed for a hunter who has
traveled Maine woods for 40 years. It is a shoe that is
made of all-weather with the protection of a water-repelling
finish. The heavy construction of the shoe has great rubber soles
and laces. The shoe (12 to 14) has a wide toe and a high
heel. It is made of the finest leather and is made in
Maine. It is a shoe that is made in Maine.

It is a shoe that is made in Maine. It is a shoe that is made
in Maine. It is a shoe that is made in Maine.

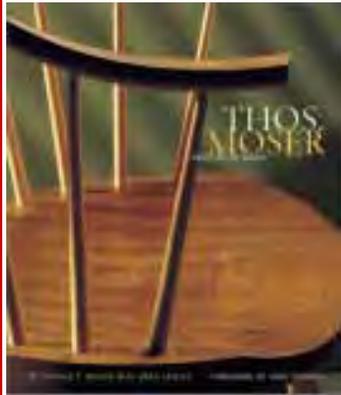

It is a shoe that is made in Maine. It is a shoe that is made
in Maine. It is a shoe that is made in Maine.

28

Sue Ackerman

Distinguished Howard Hughes Investigator discovered the sticky modifier gene which appears to cause the mis-folding of a protein in the brain. This mis-folding is a characteristic of Alzheimer's disease.

Simon John

Distinguished Howard Hughes Investigator was able to interrupt the intergenerational transfer of glaucoma in mice. He is now working with peers at Columbia University to see if the same approach can work in people.

Strengthening Communities...

Maine Downtown Center

Vibrant downtowns can ...

- be an economic engine of growth,
- be an attractant to young people, creative economic ventures, retirees and diverse populations,
- can mitigate costly sprawling land use development patterns.

Guiding Public Policy...

Making Maine the best place
for young people to
live, work, thrive and prosper.
